## **Linear Demonstrates Latest Telephone Entry Systems and Gate Operator Products at FENCETECH '09**

*Linear to demonstrate SLD and SWD Gate Operators with APeX, gate swing arms, wireless access controllers, and telephone entry systems as well as the latest addition to its family of radio technologies: TRANS PROX*

CARLSBAD, Calif. (January 7, 2009) – Linear LLC, one of the market innovators in access control, gate operators, and security systems, will display a diverse set of products at FENCETECH '09 in New Orleans next week. Linear will display its latest access and control products, including its SLD and SWD DC operators with the APeX gate operator controller, and the latest additions to its line of Plus telephone entry systems.

“FENCETECH '09 gives us an opportunity to demonstrate our latest products and how they can be integrated into a total access control solution,” said Larry Foisie, Vice President of Sales for Linear LLC. “Linear offers a complete line of gate and door operators and access and security products, which means installers and dealers get more options from a single vendor.”

Highlighting the booth at this year’s show will be the SLD and SWD DC gate operators with APeX. These gate operators are designed to work seamlessly with Linear’s telephone entry systems, including the powerful Plus series. The SLD and SWD feature built-in battery backup allowing them to continue normal operation during a power outage. They are also easily configurable and packed with options like maintenance alert, advanced timing settings, and dual gate applications.

Also on display will be Linear’s line of Plus telephone entry and access systems, the AE2000Plus, AE1000Plus, and AM3Plus. These access controllers can be configured on site, or remotely using Linear’s AXNET software utility for Microsoft Windows. The Plus line of telephone and access controllers is designed to be networked, giving installers and building managers an unprecedented level of installation flexibility and control from any location.

This year’s FENCETECH will also feature a demonstration of the advantages of Linear’s integrated solutions. This will help installers and dealers better

understand how Linear's wide range of products can be integrated to create complete entry solutions.
