

FOR IMMEDIATE RELEASE

LearnLinear.com Makes Training Easier than Ever for Dealers, Distributors

New Programs Announced, More Free Options Available

Carlsbad, Calif. (June 6, 2011) – [Linear](http://www.learnlinear.com), the leading supplier of electronic products for a host of residential and commercial applications, announces its 2011 schedule of free training programs, many of which are now more convenient than ever for professional dealers and installers. The company offers full training information and schedules at www.learnlinear.com.

Flexibility and convenience are the hallmarks of the coursework offered this year. New and improved programs are in progress that offer rigorous training, taught in a variety of formats that simplify the learning process. When participants meet the requirements for satisfactory completion of any of the training programs, they receive a certificate indicating the program title, the instructor, and, where applicable, the number of CEU units earned.

Remote Learning Options

Throughout 2011, Linear is offering free, pre-recorded training Webinars/videos for dealers, distributors and installers. These Webinars cover the latest topics, technical training, product overviews, and more.

“We are sensitive to the costs associated with traveling to face-to-face class sessions,” explains Suzan Prior, training manager for Linear. “To best accommodate those who want to learn but cannot attend in person, we have invested in this new, remote learning program, with live instructors and the opportunity for questions and answers.”

Linear customers also have the option for self-study -- training at their own pace using the company’s online training courses -- which include knowledge assessment tools.

Traditional Training at Linear University

Linear University still provides free, one-to-three day training courses every month at its Carlsbad, California campus. Many of the courses offered are CEU-Certified and meet requirements for continuing education credits. This unique format also creates a personalized setting for dealers and installers to gain hands-on experience with Linear

products, guided by veteran technical trainers and product experts. The 2011 training schedule can be found by clicking www.learnlinear.com.

“Our on-site sessions are designed to be extremely interactive, so customers gain optimum value from them,” says Prior. “We limit class sizes to eight people to allow for personal interaction with the instructors throughout the courses.”

More Online Help

Linear’s Technical Support Group has also implemented a web-based program that will greatly benefit dealers, distributors, and installers. The Knowledge Base section of the Linear website, www.linearcorp.com/faq, offers easy access to anyone who needs technical support assistance. Various product specifics are covered, as are answers to commonly-asked questions.

For more information or to register for any of Linear’s training courses, visit www.learnlinear.com. Or, contact a Technical Training Manager at (760) 421-1587.
