FOR IMMEDIATE RELEASE

### Linear Offers Three New Solar Gate Operator Accessories

Carlsbad, Calif., (February 15, 2010) -- [Linear LLC](#) is offering three new solar compatible accessories to complement its line of DC and solar gate operators, the company announced today. The products are available immediately.

“With the ever increasing attention being paid to alternative energy, Linear is bringing more solar options to deliver lower power consumption to its line of DC and solar-powered gate operators,” said Mark Mattson, product line manager. The new accessories include:

- [2500-2346-LP](#) - This low-power version of Linear’s existing “plug in style” loop detector draws 80 percent less power.
- [2500-2508](#) - This single piece probe detector or “exit wand” with adjustable sensitivity is ideal for solar applications with a very low power draw of just 1.5 mA.
- [2500-2509](#) - This wiring harness enables non-plug loop detectors to be used on the Linear [APeX](#) gate controller plug-in loop detector positions. It also enables the power and wake up signals of the reversing loop plug-in to be used in sleep mode applications.

Linear also reminds its dealers that Linear solar powered gate operator systems qualify for the Federal Tax homeowners credit equal to 30 percent off the installed cost of their system. More information on solar tax credits is available at [www.linearcorp.com/product\\_detail.php?productId=777](http://www.linearcorp.com/product_detail.php?productId=777).

For information about the new solar gate operator accessories, contact your Linear district manager or contact Linear directly at (800) 421-1587 or (760) 438-7000.

## **About Linear LLC**

Linear LLC is a pioneer in engineered radio frequency (RF) products and is a major supplier of wireless residential security systems, access control, intercoms, garage door operators, gate operators, short- and long-range radio remote controls, and personal emergency reporting systems. In recent years the company, through acquisition, has expanded into a wide range of consumer electronics, including whole-house audio/video distribution systems, central vacuum systems, music/communications systems, speaker systems, and structured wiring systems. For more information contact Linear LLC, 1950 Camino Vida Roble, Suite 150, Carlsbad, CA 92008, (760) 438-7000 or [www.linearcorp.com](http://www.linearcorp.com).
