

## PRINTED LABELING ON CENTRAL VACUUM PVC PIPE

Beginning in Q2 2006, Linear will be changing the labeling on its central vacuum PVC pipe from "M&S SYSTEMS" to "AIRVAC". This change will be phased in as PVC pipe stock is replenished.

There is no change to the functionality of the pipe, although there is a change in the listed certification of the pipe.

In addition to being ASTM F2158 certified, the new pipe is now certified and marked to meet IAPMO UMC code specifications for central vacuum piping.
