

AWPRX REPLACEMENT SOLUTION

The M&S Systems Model AWPRX Stereo Audio Rough-in Kit has been discontinued. Back orders will not be filled.

The AWPRX consisted of four audio cables and a single gang J-box. The cables connect to the four RCA jacks on a Model AWP Audio Input Wall Plate (not included, order separately). The wall plate provides two stereo auxiliary audio inputs for DMC1 and DMC3-4 installations.

As a replacement for the AWPRX, installers can order **two** Model AWPMRX Mono Audio Rough-in Kits.

The Model AWPMRX Mono Audio Rough-in Kit contains two audio cables and a single gang J-box. Ordering two AWPMRX kits will provide the necessary cables for a two-source stereo auxiliary audio input wall plate installation. The extra J-box can be saved for other uses.
