

VM123-10 MODEL NUMBER CHANGES TO VM123L

The 10-foot length of 2-inch diameter flexible gray hose used in central vacuum system installations has a new model number.

This hose is typically cut to length and used for exhaust or intake connections between the vacuum duct system and the power unit.

This part was previously sold as Model VM123-10. To conform with the new AirVac part numbering system, the Model number for this part has been changed to VM123L.

There are no other changes to this part.

For reference, all current AirVac model numbers are listed on the AirVac Web site at:

www.purelypowerful.com

VM123-10
FLEXIBLE CENTRAL VACUUM HOSE (10-FOOT)

VM123L
FLEXIBLE CENTRAL VACUUM HOSE (10-FOOT)
