

4100-05 AND 4100-15 WIRED KEYPADS DISCONTINUED

Due to legacy component sourcing issues, the Multi-Code Brand Model 4100-05 and Model 4100-15 Wired Keypads are no longer able to be manufactured and have been discontinued from the product line. Back orders will not be filled.

Following are three alternate solutions for applications requiring keypad access:

In garage door operator applications, an alternative for these products is the Model MDTK Keypad Transmitter used in conjunction with the Model MRD-U 1-Channel Plug-in Receiver. The MDTK keypad sends a wireless signal to the MDR-U receiver, which provides a relay output that can be used to trigger the operator.

Another option for garage door operator applications is the Multi-Code Model 4200-01 Keypad Transmitter. This transmitter sends a wireless signal in the Multi-Code format that can be received by an existing Multi-Code receiver on the operator, or by adding a Model 1090-20 1-Channel Receiver.

In gate operator applications, an alternative for these products is the Model AK-1 Exterior Digital Keypad. The AK-1 is a hardwired digital keyless entry system with a relay output designed for access control applications. The keypad is housed in a rugged cast aluminum enclosure that can be mounted to a pedestal or bolted directly to a wall.

Refer to the following order numbers for the alternative products:

Model #	Order #
MDTK	DNT00058
MDR-U	DNR00100
4200-01	MCS420001
1090-20	MCS109020
AK-1	ACP00738
