

**THREE NEW KEYPAD MODELS WITH UPGRADED FEATURES**

Three popular models of Linear’s access control keypads have been upgraded with new features. The new features have been added to the many existing features for each keypad.

The new features are:

- Relay operation (timed or toggle) for both relays can now be uniquely programmed for each individual entry code instead of choosing one mode for all the entry codes.
- When a relay is used for toggle operation (the relay latches after the entry of a valid code programmed for toggle, then unlatches after the next entry of a valid code programmed for toggle), the relay’s state will remain in memory even after power loss. When power is restored to the keypad, each relay will assume the state it was in when power was removed.
- The duration of the keypad lighting on the Model AK-11 can now be programmed. The lighting can be set to turn off 1, 2, 3, or 4 minutes after the last key press. The keypad lighting can also be programmed for always off or always on.

The new keypad models will be replacing the old keypad models. Refer to the following order numbers:

OLD MODEL	OLD ORDER #	NEW MODEL	NEW ORDER #
AK-1	ACP00738	AK-11	ACP00748
AK-2W	ACP00912	AK-21W	ACP00750
AK-3	ACP00903	AK-31	ACP00751

AK-11  
 Exterior Digital Keypad

AK-21W  
 Weather-resistant Digital Keypad

AK-31  
 Low-cost Interior Digital Keypad
