

## TC-200 TILT COMPENSATOR REPLACED WITH TC-200A

The ChannelPlus Brand Model TC-200 Tilt Compensator has been replaced with the Model TC-200A Tilt Compensator. Both models have the same signal specifications.

The two models do vary in their design. The discontinued TC-200 had two female "F" connectors on the body. The TC-200A is similar to an in-line filter, with a male "F" connector on one end, and a female "F" connector on the other end. A female-to-female barrel connector is supplied with the TC-200A to provide for in-line cable installations.

MODEL	STATUS	UPC CODE
