

MDRM Receiver Discontinued

Linear's MDRM 1-Channel Built-in Receiver (DNR00068) has been discontinued and is limited to stock on hand. When the stock is sold out, any backorders will not be filled, and the unit will no longer be available.

This specialty receiver was designed to mount inside the rear bulkhead of a series of garage door operators that have been out of production for many years.

As a substitute for service applications, use the Model MDR/U 1-Channel Plug-in Receiver (DNR00100). This UL Listed MegaCode receiver plugs directly into a 120 VAC outlet and does not require a separate power transformer. The receiver provides a Form "A" normally open dry contact relay output that connects through two wires to the operator's pushbutton input.

MDRM (DNR00068)
1-Channel Built-in Receiver (Discontinued)

MDR/U (DNR00100)
1-Channel Plug-in Receiver (Substitute)

All these brands are now under one name.
