

Hub Manager Software Now Available with Support for Microsoft Windows 7

Overview

Effective immediately, Linear has begun shipping Hub Manager Version 8.1 software with all new orders for Secured Series systems, prox.pad Plus, and LS2 Series products. The new software can also be downloaded from Linear's website at:

<http://www.linearcorp.com/downloads.php#ieiaccess>

Version 8.1 of Linear's Hub Manager Professional PC-based access control software manages and programs all current and legacy access hardware devices. It supports multiple or standalone controllers and a wide array of door control devices over LAN/WAN, RS-485, modem, or IR*.

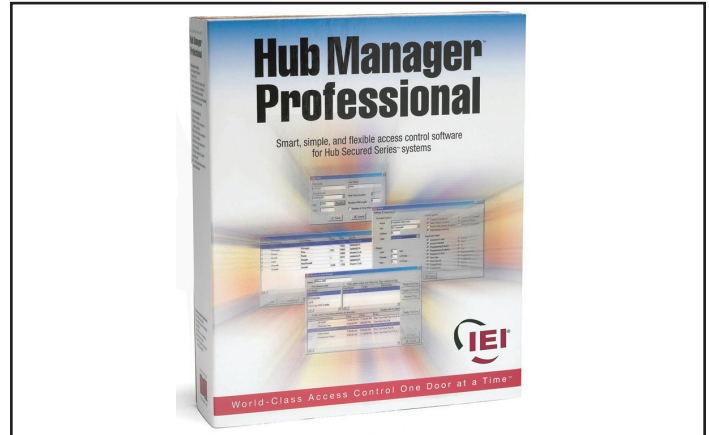

Maintaining Hub Manager's quick-and-easy reputation, the new version's enhanced video tutorials and setup wizards help to expedite the installer's job.

Hub Manager also features plug-and-play 'auto-discovery' of devices on the network, further simplifying and improving installation speed.

*LAN/WAN connectivity requires the purchase of LAN/WAN device, model numbers SEG-1 or SEG-M.

Major functionality

- Supports the Max 3 Output Module (M3-OM), which adds 8 outputs per door
- Temporary User features
- Improved access level detail screen, with each door edited separately
- Delete user feature
