

Linear's Allstar Brand MVP-SB Super Belt GDO Discontinued

Due to legacy component issues, the Linear Model MVP-SB garage door operator and its three associated belt drive T-rails are discontinued.

Several of Linear's garage door operators are available as an alternative to the MVP-SB:

- The Model LDO50 with a belt-drive Model HBT T-rail is a similar 1/2 HP rated unit.
- The Model LSO50 with a belt-drive Model HBT T-rail is a similar 1/2 HP rated unit featuring dual lamps and extra quiet motor isolation hanger brackets.
- The Model LDCO800 is a DC motor operator with soft-start and smooth-stop. Paired with a belt-drive Model HBT T-rail, the LDCO800 is a high-performance alternative to the Model MVP-SB.

See the Linear Web site for the complete line of AC and DC motor powered garage door operators, rails, and accessories.

MODELS DISCONTINUED
