Hub Manager® Software Update

Linear's Hub Manager Professional software is used to manage several access systems including, Max3, MiniMax3, prox.pad plus and LS2 & LS2P systems. The easy to use "Tasklist Clipboard" and in-depth reports are just some of the advantages Hub Manager Professional software brings.

The latest version of Hub Manager Professional is Version 8.1 that is compatible with Windows 8, Windows 7, XP, and Vista and is included with the product.

Due to movement of inventory, the version of the Hub Manager CD included with systems may not be the latest version. If you did not receive the latest version, for maximum compatibility and to apply the latest upgrades, download the latest version from the Linear Web site at:
