FOR IMMEDIATE RELEASE

Dedicated Micros Announces Alliance with International Electronics, Inc.

Chantilly, VA December 2005 -- Dedicated Micros Inc. of Chantilly, Virginia announces a partnership with International Electronics, Inc. (IEI) of Canton, Massachusetts.

International Electronics, Inc.'s eMerge Version 2.0, an integrated browser managed security platform, now supports the DV-IP Server and the New DS2 NetVu-Connected digital video recorders (DVRs) from Dedicated Micros.

Video recording is fully integrated with event detection and playback is integrated through activity reporting. Video motion that is detected by the NetVu-Connected DVRs can generate alarms on the eMerge platform. Conversely, alarms and other events generated on eMerge can be used to initiate video recording on the DVRs or DV-IP Server.

“Integration with video recording is the most significant new feature added to the eMerge platform,” said John Waldstein, president and CEO of International Electronics. “Dedicated Micros is an industry leader in digital video recording, with extensive experience and a quality reputation. We are pleased to take advantage of our mutual IP networking focus to deliver a solution with superior capabilities and a wide range of applications.”

Full motion analog and IP camera video is rendered directly to a web browser. Telemetry controls supported by each camera are displayed, and PTZ functions are easily accessed with the mouse.

“The integration of eMerge with Dedicated Micros delivers high quality, high frame rate video of both current and recorded scenes to users through eMerge’s common web browser interface,” said Don Taylor, vice president of marketing for Dedicated Micros.

Dedicated Micros, Inc., which supports North and South America, is a wholly owned subsidiary of the UK-based Dedicated Microcomputers Group Ltd. The company is credited as one of the first to market with general multiplexing technology and digital video technology. Today, Dedicated Micros Inc. is a world leader in the CCTV control industry. Their solution provides robust, dedicated, user-friendly multiplexing hardware with digital or video capability for security surveillance. For more information, visit the Dedicated Micros website at www.dedicatedmicrosus.com.

International Electronics, Inc. (IEI), an ISO9001:2000 certified manufacturer, designs, manufactures, markets and sells electronic access control equipment and browser-managed security platforms used in residential and commercial security systems and wireless access control and fleet management systems for industrial mobile asset applications. IEI's products include its Door-Gard™ and Secured Series™ access control lines, its LS line of integrated battery operated door locks, its eMerge™ browser-managed access and security management products and its line of PowerKey™ industrial access control and fleet management products. IEI markets its security management and access control products to leading distribution and electronic security installation companies, and its PowerKey™ products directly to material handling equipment users worldwide. For more information about IEI visit www.ieib.com.
