FOR IMMEDIATE RELEASE

### **Linear Enhances Residential Actuator Gate Operator Capabilities**

*Control Two Gates; Includes Popular APeX Controller*

**Carlsbad, Calif., (November 2, 2010)** -- [Linear LLC](#) announces an expanded feature of its LRA Gate Operator: two gate leaves can now be controlled via a single controller.

The updated Model LRA residential swing-arm Gate Operator uses an “intelligent” DC motor control board that interfaces with a single APeX™ controller, operating actuator arms for two gate leaves, each with a maximum weight of 600 lbs., and a maximum length of 16 feet.

“Dealers get a simpler installation, and homeowners benefit from a cleaner-looking installation with the single controller,” says Larry Foisie, Linear's Vice President Sales, Entry Systems.

The enhanced LRA continues to deliver all the features as before, with the addition of built-in provisions for gate stagger, and pluggable arm wiring connections. The Operator continues to offer an elegant arm style, adjustable soft start/stop, and incorporates reliable magnetic limits.

Unlike other dual arm gate operators, Linear's LRA models employ its APeX controller, which offers numerous advantages for installation and ongoing use:

- Full feature set *and* low power modes
- Built-in MegaCode receiver with 2 assignable MGT spots
- European-style pluggable wiring connections
- Absolute, current sense adjustment with real time monitoring; and digital set point for quick, accurate adjustment and enhanced safety
- Programmable warning beeper during pre-start and gate movement, with ADA-compliant provisions
- LED diagnostic display for ease of setup and troubleshooting
- Built-in charge control circuitry for solar applications
- UL325/UL991 compliant

The LRA Dual-Arm unit comes with a two-year guarantee. When powered by solar panels, it qualifies for a homeowner 30 percent tax credit of the value of the operator system.
