### **Linear Now Offers Spanish Language Live Support for Technical and Customer Service**

**Carlsbad, CA – April 22, 2013** – Linear LLC, a leader in residential and commercial access control, security, and health and wellness solutions, announces Spanish language live support for both its Technical Service and Customer Service departments. In an effort to better serve the growing Spanish-speaking community in the U.S. and in the expanding Mexican and South American markets, Linear has assigned four Spanish speaking agents in each department, with additional expansion planned as needed.

“At Linear, we believe in providing the best customer service and technical support to all our clients and partners. Mexico, South America and Spanish speaking Americans represent an important customer base for Linear and our bi-lingual representatives are already standing by to answer technical or service-related questions,” said Greg Hancock, director of customer care at Linear. “We are excited to expand this service and will continue to provide a high level of expertise and service to all of our customers.”

Linear is a leading manufacturer of security and access control solutions, health and wellness technology products, garage door openers and wireless devices. With the recent acquisition of 2GIG Technologies, Linear’s dealers and OEM partners gain access to 2GIG’s Go!Control platform, the first widely adopted integrated security and automation system that includes a system CPU, touchscreen interface, Z-Wave radio for automation, cellular radio for communications with a central station, and narrow-band RF for communicating with security sensors. Offering Spanish language support is an important step for Linear as the company expands distribution of its product line and OEM services into Latin America.

**About Linear LLC**

*For over 50 years, Linear LLC has been an innovator in the security market. Linear's legacy includes the early application of passive infrared detection and radio frequency (RF) transmission, technologies that revolutionized the wireless security and access control industries. Today, Linear delivers class-leading wired and wireless products into a variety of markets serving the access control, security and home technology needs of its customers. The acquisition of 2GIG Technologies® in 2013 gives security dealers, distributors and OEM partners access to one of the most technologically-advanced residential security and home management solutions in the industry; 2GIG GO!Control™ – the first self-contained, all-in-one security and home management system. Formed in 2007, over 1 million 2GIG Go! Control panels have been shipped. Linear continues to expand product and engineering prowess, leveraging the knowledge gained from strategic acquisitions and custom product development which will help lead the company into the next 50 years.
