Fixed Dome Housings

HS9349 Series

Installation and Operating Instructions
IMPORTANT SAFEGUARDS

1. Read Instructions - All the safety and operating instructions should be read before the unit is operated.
2. Retain Instructions - The safety and operating instructions should be retained for future reference.
3. Heed Warnings - All warnings on the unit and in the operating instructions should be adhered to.
4. Follow Instructions - All operating and use instructions should be followed.
5. Cleaning - Unplug the unit from the outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
6. Attachments - Do not use attachments not recommended by the product manufacturer as they may cause hazards.
7. Accessories - Do not place this unit on an unstable stand, tripod, bracket, or mount. The unit may fall, causing serious injury to a person and serious damage to the unit. Use only with a stand, tripod, bracket, or mount recommended by the manufacturer, or sold with the product. Any mounting of the unit should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.
8. Ventilation - Openings in the enclosure, if any, are provided for ventilation and to ensure reliable operation of the unit and to protect it from overheating. These openings must not be blocked or covered. This unit should not be placed in a built-in installation unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.
9. Power Sources - This unit should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply you plan to use, consult your appliance dealer or local power company. For units intended to operate from battery power, or other sources, refer to the operating instructions.
10. Grounding or Polarization - This unit may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.
Alternately, this unit may be equipped with a 3-wire grounding-type plug, a plug having a third (grounding) pin. This plug will only fit into a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.
11. Power-Cord Protection - Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords and plugs, convenience receptacles, and the point where they exit from the appliance.
12. Power Lines - An outdoor system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outdoor system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal. U.S.A. models only - refer to the National Electrical Code Article 820 regarding installation of CATV systems.
13. Overloading - Do not overload outlets and extension cords as this can result in a risk of fire or electric shock.
14. Object and Liquid Entry - Never push objects of any kind into this unit through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the unit.
15. Servicing - Do not attempt to service this unit yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
16. Damage Requiring Service - Unplug the unit from the outlet and refer servicing to qualified service personnel under the following conditions:
   a. When the power-supply cord or plug is damaged.
   b. If liquid has been spilled, or objects have fallen into the unit.
   c. If the unit has been exposed to rain or water.
   d. If the unit does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the unit to its normal operation.
   e. If the unit has been dropped or the cabinet has been damaged.
   f. When the unit exhibits a distinct change in performance—this indicates a need for service.
17. Replacement Parts - When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.
18. Safety Check - Upon completion of any service or repairs to this unit, ask the service technician to perform safety checks to determine that the unit is in proper operating condition.
19. Coax Grounding - If an outside cable system is connected to the unit, be sure the cable system is grounded. U.S.A. models only—Section 810 of the National Electrical Code, ANSI/NFPA No.70-1981, provides information with respect to proper grounding of the mount and supporting structure, grounding of the coax to a discharge unit, size of grounding conductors, location of discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.
20. Lightning - For added protection of this unit during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the unit due to lightning and power-line surges.

SAFETY PRECAUTIONS

CAUTION: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT OPEN COVERS. NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This label may appear on the bottom of the unit due to space limitations.
The lightning flash with an arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.
The exclamation point within an equilateral triangle is intended to alert the user to presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE UNITS NOT SPECIFICALLY DESIGNED FOR OUTDOOR USE TO RAIN OR MOISTURE.

SECURITE

DANGER: POUR EVITER TOUT RISQUE D'ÉLECTROCUTION, NE PAS OUVRIR LE BOÎTIER. IL N'Y A PAS DE PIÈCES REMPLAÇABLES À L'INTÉRIEUR. POUR TOUTE RÉVISION, S'ADRESSER À UN TECHNICIEN SPÉCIALISÉ.

En raison de limitation de place, cette étiquette peut être placée sur le dessous de l'appareil.

L'éclair fléché dans un triangle équilatéral, avertit l'utilisateur de la présence d'une "tension dangereuse" non isolée à l'intérieur de l'appareil et d'une valeur suffisante pour constituer un risque d'électrocution.

Le point d’exclamation contenu dans un triangle équilatéral, avertit l’utilisateur de la présence, dans la documentation qui accompagne l’appareil, de consignes d’utilisation et de maintenance importantes.
SICHERHEITSVORKEHRUNGEN

VORSICHT: UM EINEN ELEKTRISCHEN SCHLAG ZU VERMEI- DEN, ABDECKUNG NICHT ENTFERNEN, WARTUNGEN ALLER ART QUALIFIZIERTEM PERSONAL ÜBERLASSEN.

Aus Platzgründen kann diese Warnung auf der Unterseite des Gerätes angebracht sein.

Das Blitzsymbol im gleichseitigen Dreieck soll den Benutzer auf nicht isolierte “Hochspannung” im Gehäuse aufmerksam machen, die eventuell stark genug ist, um einen elektrischen Schlag zu verursachen. Das Ausrufezeichen im gleichseitigen Dreieck soll den Benutzer auf wichtige Bedienungs- und Wartungsanleitungen in der dem Gerät beigefügten Literatur aufmerksam machen.

WARNUNG UM FEUER ODER ELEKTRISCHE SCHLÄGE ZU VERMEIDEN, SETZEN SIE DAS GERÄT NIEMALS REGEN ODER FEUCHTIGKEIT AUS.

1 UNPACKING

Unpack carefully. This equipment should be handled with care.

Check to ensure that the following items are included for the applicable modules ordered:
• HS9349 Series Fixed Dome Housing for fixed cameras.
• Hardware Kit: see 6 PARTS LIST.
• Template Tool.

If an item appears to have been damaged in shipment, replace it properly in its carton and notify the shipper. If any items are missing, notify Aigis Mechtronics.

The shipping carton is the safest container in which the unit may be transported. Save it for possible future use.

2 MODEL NUMBERS

Model No. Color
HS9349 Black Trim Ring
HS9349W White Trim Ring

3 SERVICE

If the unit ever needs repair service, the customer should contact Aigis Mechtronics.
4 INSTALLATION

Attention: Installation should be performed by qualified service personnel only, in accordance with the National Electrical Code or applicable local codes. Refer to applicable installation section.

4.1 Suspended Ceiling Mounting

CAUTION: These units must be properly and securely mounted to a supporting structure capable of sustaining the unit weight. Use care when selecting mounting hardware (not supplied) for installation. The mounting surface and unit’s weight should be carefully considered.

Mount the unit in a suspended ceiling grid using the existing ceiling tile as follows:

1. Remove tile at desired location
2. Move adjacent tiles for access as required.
3. Cut a 172 mm (6.75 in) diameter hole in the center of the tile. Use two pencils (or a pencil and a nail) with the template tool provided to draw the circle.
4. Install box into pre-cut tile with the bottom flange, then press against the tile. Position the round section of the box in the direction that the camera will be aimed. See Figure 1.

5. Pull the drawstring tight (away from the screw) and lock into groove. **DO NOT CUT DRAWSTRING** Push the excess string through the hole provided. As an option, a screwdriver may be used to turn screws and lock ceiling clamps in place.
6. Reinstall tile in grid.
7. Fasten support wire (not provided) to structural framing, masonry, or concrete above the unit. Connect the other end to the eyebolt in the top of the box. Draw wire tight and twist securely.
8. Run the electrical cable into the housing through the conduit as required by applicable codes.
9. Complete the electrical connections.
10. Adjust camera bracket to proper angle and mount camera to camera bracket. See Figure 2.

11. Assemble dome in the trim ring by lining the slots in the dome with tabs in the trim ring. Push one side of the dome under the tab; the other side should clear the other tab. Turn the dome to secure it.
12. Attach the dome/trim ring by lining up the dots on the box and the trim ring. Push on one side of the trim ring near the flat section of the box, then push on the other side of the trim ring until it snaps into place. Listen for a distinct click to ensure ring is securely in place. See Figure 3.

Figure 1

Figure 2

Figure 3
6. Adjust camera bracket to proper angle and mount camera to camera bracket. See Figure 5.

7. Assemble dome in the trim ring by lining the slots in the dome with tabs in the trim ring. Push one side of the dome under the tab; the other side should clear the other tab. Now turn the dome to secure it.

8. Attach the dome/trim ring by lining up the dots on the box and the trim ring. Push on one side of the trim ring near the the flat section of the box, then push on the other side of the trim ring until it snaps into place. Listen for a distinct click to ensure ring is securely in place. See Figure 6.

9. Adjust the dome so that the viewing slot is in the proper position.

5 MAINTENANCE

No special maintenance is required.

If internal wiping is necessary, use only microwave type paper towels, or equivalent soft paper towels. Roll a section into a tightly wound tube, tear tube in half, and wet the fuzzy torn end with a solution of isopropyl alcohol diluted with water. While holding the dome with its opening facing down, wipe the interior using a circular motion spiraling in toward the center. Use a new paper towel for each two passes.

To clean the exterior of the dome, use any nonabrasive cleaning cloth and cleaning agent that is safe for use on acrylic plastic. Liquid or spray cleaner/wax suitable for use on fine furniture is acceptable.
