Extra Large Outdoor Housings

The 5-inch diameter HS9392 Series and the 7.5-inch diameter HS9396 Series Housings are designed to enclose large zoom lenses and cameras. These durable housings are constructed of an extruded aluminum cover, a fabricated aluminum frame for mounting the camera and include an aluminum sunshield. The design allows the frame to be rotated within the housing cover once the unit is mounted in order to achieve the optimal viewing angle. The base of the housing can be mounted to a pan/tilt/zoom head, or can be attached to any of the Aegis Heavy Duty mounts.

Both series include a liquid-tight 16-pin connector that minimizes moisture entry into the housing. The housings come equipped with a heater designed to minimize fogging of the viewing window in high humidity areas, and to extend the minimum operating temperature in cold conditions. A pressurized version is available that further reduces the amount of moisture around the electronics, and an optional pressure sensor can warn of dropping pressure within the housing. The pressurized versions extend the ingress protection rating from IP-67 to IP-68. Other options include IP wiring, a tamper switch, and an On Screen Display.

Notes:
1. **Heater-Defogger**: Thermostatically-Controlled heater-defogger requires 40 watts.
C Model numbers have a 16-pin corrosion resistant connector with mating connector and crimp pins supplied.
P Model numbers have fill and release valves and can be filled with dry Nitrogen. They also have a 16-pin corrosion resistant connector with mating connector and crimp pins supplied.

**MECHANICAL**

**Maximum Camera/Lens Size:**
- **HS9392** series accepts cameras/lens combinations up to 3.25” W x 3.0” H x 13” L (82.6mm W x 76.2mm H x 330.2mm L).
- **HS9396** series accepts cameras/lens combinations up to 5.5” W x 6.0” H x 17” L (139.7mm W x 152.4mm H x 431.8mm L).

**Cable Entry:**
One pre-wired, corrosion resistant, 16-pin shell sized 20 liquid-tight connector. Hardware kit includes the mating connector and crimp pins.

**Window:** 1/8-inch (3.2mm) strengthened glass, optical quality.

**Viewing Area:**
- **HS9392**: 3.81-inch diameter (96.8mm).
- **HS9396**: 4.80-inch diameter (121.9mm).

**Housing Mounting:**
Three 0.28-inch diameter (6.4mm) clearance holes in base.

**Camera Mounting:** Slotted internal rail assembly which may be rotated through 360°. All camera/lens mounting hardware is provided.

**Construction:**
Extruded aluminum cover, fabricated aluminum frame, strengthened glass window.

**Finish:** Light gray powder coat.

**Dimensions:** See Dimensional Outlines.

**Weight:**
- **HS9392**: Housing 20.6 lbs (9.3 kg) Sunshield 3.2 lbs (1.5 kg)
- **HS9396**: Housing 20.6 lbs (9.3 kg) Sunshield 4.0 lbs (1.8 kg)
**Options & Accessories**

**Sunshield:** Included with the HS9392 and the HS9396 Series housings. Sunshields provide protection from the direct rays of the sun and promote cooling to reduce the internal housing temperature.

**Tamper Switch:** Adds a pre-installed tamper switch that is activated when the cover is removed from the housing. Max operating voltage = 250VAC or 28VDC / 5 amp.

**Pressure Switch:** Adds a pre-installed pressure alarm to the pressurized housing series that sends a signal if the internal pressure drops below 2±0.25 PSI

**OSD Board:** On-Screen-Display option includes an instrument readout overlaid on top of the video signal. Temperature and/or pressure conditions in the housing can be displayed.

**IP Wiring:** 16-pin connector set up to accept Cat-5/e/6 wiring.

**Recommended Mounts** - Other options available see the Heavy Duty Mount Datasheet.

- **MT9234 Wall Mount** - Heavy duty 16-inch wall bracket with extra large adjustable head.
- **MT9235 Wall Mount** - Heavy duty 22-inch wall bracket with extra large adjustable head.

*Contact the factory for part number and pricing.

**Environmental**

**ITSA Transportation Test:** Designed to meet ITSA requirements

**Salt Atmosphere:** MIL-STD-810E, Method 509, Procedure I.

**Enclosure Protection:**
- Unpressurized: Designed to NEMA-6, IP67
- Pressurized: Designed to NEMA-6P, IP68

**Safety:**
- CE: Designed to comply with EN60065
- UL/cUL: Designed to comply with CCTV Appliance Code UL2044
