Warranty

Multiplex Technology, Inc., warrants this product to be free from defects in materials and workmanship for a period of one year from the date of purchase or MTI will repair or, at its option, replace the defective product. To obtain warranty service, call MTI for a Return Material Authorization (RMA) number and return the product pre-paid accompanied by a copy of the purchase receipt,

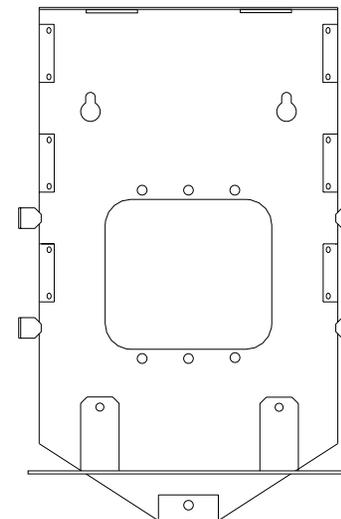

Attention: Customer Service. Please put the RMA number on the outside of the carton.

Any implied warranty arising from the sale of the product including implied warranties of merchantability and fitness for purpose are limited to the warranty stated above. MTI shall not be responsible for any loss, damages or expenses, whether direct, consequential, or incidental arising from the use or inability to use this product. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation or incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights, and you may have other rights which vary from state to state.

How to wire a house

*The Media Center may require three coax runs - one feed (upstream) from the 2600 Telecom Panel, one feed (downstream) from the modulator to the 2600 Telecom Panel, and one feed for the satellite receiver.

NOTE:

We recommend using only RG-6 coax when wiring a house. Why? Although good RG-59 has only slightly more loss than RG-6, it is harder to find good RG-59. RG-6 is a little more expensive and a little harder to run (because it is thicker). But you will avoid surprises if you stick to RG-6.
