

# PowerKey AC™

## The Keyless Solution

### The Safety Switch For Industrial Power Equipment.

## Limit Operation Only To Authorized Personnel.

Control the power to AC 110 or 220 powered equipment with an access control keypad. The operation of the on/off switch on the equipment still functions normally. Now the circuit is controlled by the computer in PowerKey™.

### **REDUCE ACCIDENT LIABILITY CLAIMS.**

- Limits use to qualified authorized operators
- Shuts down idle equipment
- Automatic shutdown when electric overloads occur
- 'Lockout' damaged or unsafe equipment

## PowerKey™

**For A Safer, More Productive Controlled Workplace**

# PowerKey AC™

## The Keyless Solution

### **PowerKey™ Features**

- Individual Operator Access Numbers
- One Current Sensing Circuit for Auto-Shut-down
- No Load Sensing for Timed Shut-down
- Overload Sensing for Instant Shut-down
- Lock-out Code To Ensure No One Operates Equipment
- Controls Two Devices-i.e.-Saw and Blower
- LED Visual Status Indicators:
  - Green-ON, Red-OFF, Blinking Red-LOCKOUT,
  - Flashing Green-TIMED SHUTDOWN
  - Alternate Red & Green-OVERLOAD SHUTDOWN
- Programming at the Keypad-No External Device Needed

#### **OPERATING SPECIFICATIONS: Indoor Use**

CONTROLS UP TO:	TEMPERATURE
20 Amps @ 110	-20° F to 130° F
17 Amps @ 220	-28° C to 54° C

Programmable Timer-10 to 990 Seconds

99 Different PIN Numbers Available
