## **Linear® Adds New 7" e3 Entry to its Family of Award-Winning Access Control Solutions at ISC West 2018**

LAS VEGAS, NEVADA, April 11, 2018 – Following last year’s successful debut of its award-winning 4.3” e3 Entry System, [Nortek Security & Control](#) (NSC) today announced the addition of the new 7” e3 Entry System to the Linear® line of innovative access control and telephone entry solutions. Equipped with a larger touchscreen display with a keypad, the new offering is making its debut at ISC West 2018 in the Sands Exposition Center in Las Vegas, Nevada in Nortek Security & Control Booth #20015.

“The browser-based Linear e3 Entry System is designed for a new generation of customers and end-users who want modern telephone entry and cutting-edge physical access control systems for multi-dwelling/tenant buildings and gated communities,” John LaFond, VP of Integrated Systems for NSC said today. “The new Linear 7” e3 Entry simplifies the end-user experience with a touch screen and full query keyboard, which minimize the number of steps. Dealers save time with an easy-to-install solution that’s

equipped with an intuitive installation wizard and one common database and programming interface to configure.”

Linear® e3’s new 7” weatherproof product features a larger touchscreen display with a self-adjusting sensor, making it easy-to-read both during the day and at night, as well as in rain, sleet and snow. The display is paired with a stainless-steel keypad featuring recessed illuminated blue keys, and a polycarbonate home key with white illuminated backlighting.

Equipped with a motion sensor, ambient light sensor, and optional HD IP camera, the new offering includes a built-in postal lock and 3-point locking mechanism for added security. For noise reduction and voice clarity, the 7” e3 Entry also features digital signal processing.

For added durability, the product’s new faceplate is engineered with Linear ArmorTech™ polycarbonate and stainless steel. Polycarbonate makes it light and easy to install for dealers, optimizing the RF transmission while also providing esthetically pleasing design and added durability against force and harsh weather elements.

“Access control systems are not always fully leveraging the technological innovations of today,” LaFond concluded. “The Linear access control solutions change the game with intuitive systems that modernize the experience for commercial end-users. Our goal at Nortek Security & Control is to exceed our customer’s expectations with products that defy the norm, and the new 7” e3 Entry is a great example.”

Shipping in May 2018, the 7” e3 Entry is now on display at ISC West in Nortek Security & Control Booth #20015.
