Nortek Security & Control Expands the Connected Smart Home and Security Ecosystem at ISC West 2018

2GIG® extends its functionality with the new GC3 Panel integration with the ELAN® Entertainment and Control Platform.

CARLSBAD, CALIFORNIA, April 6, 2018 – Energized by the operational merger with home automation and A/V sister company Core Brands, [Nortek Security & Control](#) (NSC) will unveil its broadest ever range of security, control, automation and entertainment solutions at ISC West 2018 in Las Vegas, Booth #20015 in the Sands Expo & Convention Center. Anchored by new 2GIG solutions, the NSC product presentation will feature new connected devices and systems for the residential smart home, security, access control, and digital health markets. The expanded line is designed to meet the specific needs of security installation professionals everywhere.

“We are dedicated to delivering innovative and highly reliable solutions that exceed dealer and end-user needs in every type of installation,” said Nortek Security & Control President Mike O’Neal. “ISC West is a great opportunity to meet with our channel partners and we look forward to sharing our new security, access, and connected smart home solutions at the show.”

According to O’Neal, the merger with Core Brands creates a powerful value proposition where the NSC security and control foundation has expanded to include home automation and entertainment. This category integration enables NSC to better meet the growing needs of security professionals, custom installers and their clients. “NSC now combines security, control and entertainment solutions like no one else in the market,” O’Neal emphasized. “We look forward to sharing this robust new integration and showing our dealers how it can help their transform their business.”

2GIG[®] changed the game in residential security first with its industry-shattering color touchscreen GC2 panel, and more recently with its flagship panel, the large-color-screen GC3. At ISC West 2018, NSC will highlight the new 2GIG GC3 integration with the **ELAN**[®] **Entertainment & Control Platform**, enabling seamless security control within the fully connected smart home experience. “This pairing is the first full integration between 2GIG and a home control and automation platform,” O’Neal commented. “It is an important step in delivering the ultimate enhanced connected home experience.”

NSC will showcase the new **2GIG** sensor line, including the **Stove & Grill Guard**[™], the first stove and grill sensor that sends a customizable notification to a homeowner’s smart phone or control panel when a grill or stove knob is turned from the “off” position. Also being featured is the **2GIG Rely**[™] line of security products – including three new video cameras – ideal for renters and affordably priced.

NSC will debut the new addition to the award-winning line of **Linear**[®] access control solutions, the **7” E3 Entry**, and will showcase the new **Numera**[®] **EverThere**[®] **Health Tracker** feature for Numera Libris[®] users.

ISC West will also mark the debut of the new **ELAN** Surveillance line of IP cameras and network video recorders, the new **Xantech**[®] HDMI Distribution line, and the sleek and modern **Proficient**[®] Protege[™] Cabinet Loudspeakers.

“We are proud to serve our customers with a broad and connected suite of reliable security, control and entertainment solutions,” concluded O’Neal. “And we look forward to sharing our latest innovations with them at ISC West 2018.”

About Nortek Security & Control

Nortek Security & Control LLC is a global leader in smart connected devices and systems for residential smart home, security, access control, AV distribution, and digital health markets. NSC and its partners have deployed more than 4 million connected systems and over 25 million

security and home control sensors and peripherals.
