

ALLSTAR TECHNICAL NOTE

Product: Gate Star Operators

Subject: Motor Control Revisions

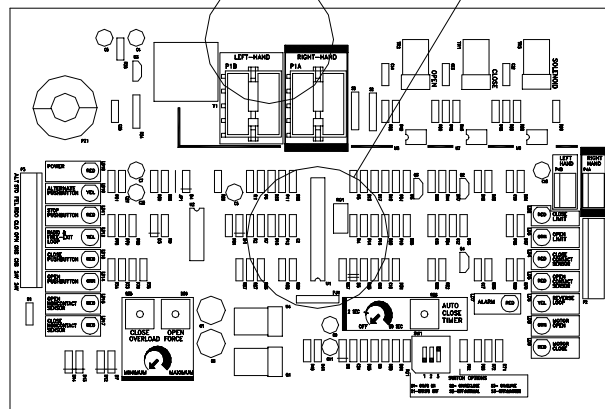

Gate Star motor controls have two identification numbers affixed to the product at the factory. The first number identifies the MCB Type and revision. The second number identifies the software version and revision. When changes are made the revision letter is changed (see diagram below). The MCB Type label also indicates a manufacturing date code and unique serial number for each control.

Changes are made to improve product performance, improve manufacturing or address installation issues and will be made as required. Controls returned for repair will be upgraded to the latest production revision. The table below shows the current revision status (as of April 04th, 2001).

Product	MCB Type & Revision	Software Version & Revision
Gate Star 1000	110128 REV D	110158 D
Gate Star 1000 DO	110129 REV D	110162 D
Leader Plus	110001 REV D	110074 F
Gate Star 4000	110074 REV D	110073 F
