

## HEAVY DUTY OPERATOR FOR CLASS I, II, III & IV INSTALLATIONS

*The low-friction, high-efficiency timing belt drive system instead of conventional gear reduction, provides lower initial cost, lower installation costs for electrical supply and reduced energy cost in high-cycle operations.*

### **GATE STAR 1000**

#### **Slide Gate Operator - Model GSX1000**

**MAX Gate Length: 45 FT.**

**MAX Gate Weight: 1575 lbs.**

#### **Features**

- CGA2K™ Technology
- UL325 & 991 Listed
- Rated for Continuous Duty
- Heavy, Key-Locked Cover
- Cam-Driven Switches for Limits
- Built-In Maximum Run Timer for Added Safety
- Built-In Adjustable Auto-Close Timer
- Built-In Master/Slave Capability
- 13 Diagnostic LED's for Easy Service
- Easy Conversion Right-Hand/Left-Hand Drive
- Super-Efficient, Non-Slip Timing Belt Drive

- Keyed Disconnect for Manual Operation of Gate
- Welded Uni-Body Frame with Powder Coated Finish
- #40 Steel Roller Chain
- Pre-wired 9931FC Receiver

#### **Options**

- Radio Controls
- Standby Power Supply (battery backup)
- Chain Disconnect
- Photobeams
- Electric Edges
- 220V Operation
- #50 Roller Chain
- Drop-Out Lock
- Hi-Speed (24"/sec., Class IV)
- Traffic Control Devices

### **CGA2K™ Technology**

#### **Standard On Every Allstar Gate Operator**

#### **Features**

- UL325 & 991 Listed
- Independently Adjustable Open & Close Inherent Anti-Entrapment System
- Selectable Control by Additional Operator (Master/Slave)
- Adjustable Auto-Close Timer (off, 2-60 seconds)
- Self-Adjusting Maximum Run timer

- Detected Entrapment Alarm
- Electronic (Dynamic) Braking
- Secure-Safe™ Pushbutton Control (patent pending)
- Separate Inputs for Access Control Devices and Entrapment Protection devices
